

FCC –

Please protect Net Neutrality. Please protect free and open internet. When a profit-based speed hierarchy is placed upon the internet, you leave the poor at a further disadvantage. EVERYONE uses the internet – for paying bills, looking for work, creating products – but if what is basically a class distinction is put in place, it makes it that much harder for poor folks to better their means; AKA it widens the disparity between rich and poor even further in the name of profit. And this is not even taking into account the ethical concerns that would arise if this speed hierarchy were misused on individuals or groups. This shameful kind of practice should not be the face of the American free market.
